SUMMARY

I have 8 years of experience in the IT industry, in the areas of software development, design and architecture. My strengths are in the areas of design, functional analysis, development and implementation of Windows-based applications, web-based and multi-tier database projects. I have an extensive knowledge of C# and related Windows/.NET technologies.

TECHNICAL SKILLS

Operating Systems/Platforms:

- DOS, Windows 16/32 bit
- Microsoft .NET 1.0, 1.1, 2.0, 3.0 and 3.5
- Novell Mono

Languages:

- C#, Delphi and Pascal
- Familiar with Visual Basic .NET, C and C++
- Basic knowledge of Java and J#

Development Tools:

- Microsoft Visual Studio.NET 2003, 2005, 2008
- Borland C# Builder
- ASP.NET WebMatrix
- Borland Delphi 8 for .NET
- Borland Delphi 1-7
- Turbo/Borland Pascal 3-7

Database Servers:

- MS SQL Server, Oracle, InterBase
- Basic knowledge of MySQL and Progress

Frameworks & Other Technologies:

- .NET Framework Classes (FCL), ADO.NET, ASP.NET, Web Services, Web Server Control Creation, Remoting, Windows Forms, Windows Control Creation, ASP.NET Web Server Controls, Windows Mobile technologies

- Data Access Layer (DAL) creation, Service-oriented designing and Automation-based designs for .NET
- Visual Component Library (VCL), Delphi Component Architecture, MIDAS/DataSnap, Borland WebBroker, Delphi Web Services
- Windows API, COM/DCOM, XML, ADO, ASP, HTML, AJAX, Javascript

.NET Tools:

- NAnt, MSBuild, NUnit, xUnit, NDoc, SandCastle, FxCop
- CruiseControl.NET
- CodeSmith

Other Tools:

- Rational Rose, ERWin

CERTIFICATIONS

Microsoft Certified Professional

I am a Microsoft Certified Professional (MCP), and am currently attempting to obtain the certification for Microsoft Certified Solutions Developer (MCSD).

My MCP transcript can be viewed at

<http://www.microsoft.com/learning/mcp/transcripts>

Transcript ID: 668201

Access Code: jeevanjames

Exams Completed:

- Developing and Implementing Web Applications with Microsoft C# .NET and Microsoft Visual Studio .NET
- Developing and Implementing Windows-based Applications with Microsoft Visual C# .NET and Microsoft Visual Studio .NET

WORK EXPERIENCE

Oct. 2005 – Present

Technical Leader

Thomson Corporation
Bahai's Bhavan Road, Bangalore
<http://www.thomsonfinancial.com>

Project Name: Thomson ONE Thin RealTime Components
Designation: Technical Lead
Roles: Architecture, Design and Development
Tools Used: .NET Framework 2.0, ASP.NET 2.0, Microsoft Ajax, Web Server Control Creation, Javascript, Web services

The Realtime components are one of the major components of Thomson's flagship product Thomson ONE. They provide real-time financial information to investors, wealth managers and financial institutions. The work involved several months of research & development into technologies such as AJAX and the .NET 2.0 framework.

Dec. 2002 – Oct. 2005

Adea International Pvt. Ltd.

Senior Software Engineer

Hosur Road, Bangalore
(formerly Netkraft Pvt. Ltd.)
<http://www.adeasolutions.com>

Project Name: Workflow Management System (WMS)
Client: Adea International
Designation: Project Manager and Technical Architect
Roles: Architecture, Design and Development
Tools Used: .NET Framework 1.1, Windows Forms, ASP.NET, Remoting, ADO.NET, Web Services, .NET Role-based Security
Database: MS SQL Server 2000

WMS is an automation system for centrally managing the workflow across the entire organization, from support departments such as HR and Finance, to software development and testing teams. Comprising of 3 distinct client applications, it allows any user to create, manage and track work items.

Project Name: Print Production
Client: J. Knipper & Co. Inc., USA
Designation: Designer
Roles: Design
Tools Used: .NET Framework 1.1, ASP.NET, Remoting, Crystal Reports, BizTalk Server 2004, VB.NET
Database: MS SQL Server 2000

Print Production is an automated system used by the client to bulk print data-entry forms used by their sales representatives during visits to pharmacists and hospitals. The software used Crystal Reports and remoting technologies to achieve high performance for bulk server-side printing.

Project Name: Atlas (SharePoint Proof-of-Concept)
Client: Trados Inc., USA
Designation: Designer, Developer
Roles: Technical Design and Development
Tools Used: .NET Framework 1.1, Windows SharePoint Services, Microsoft SharePoint Portal Server, C#, ASP.NET, SharePoint Web Parts, MS Office Research Services
Database: MS SQL Server 2000

Atlas is a web portal system that powers the internal intranet used by the client organization for document management, scheduling and information distribution. This project was a proof-of-concept for converting this portal to use Microsoft's SharePoint Portal Server software. It involved the creation of several custom web part components

Project Name: Impact Retail Suite
Client: [Name withheld due to NDA], Belgium
Designation: Technical Lead, Domain Expert, Designer
Roles: Technical Design and Development, On-site functional study, Client interaction, Functional design

Tools Used: Java, EJB, JSP, Struts, Sonic MQ
Database: Progress RDBMS

Impact Retail Suite is a Java-based retail management software. It consists of a set of software modules that allow retailers to seamlessly integrate the operations of all their stores over the Internet and intranet. These modules include product and price management, promotion & campaign management, cash flow management, sales results, end-of-day processing, POS integration and management, and labelling.

Dec. 2000 – Dec. 2002
Software Engineer

Agni Software Pvt. Ltd.
Malleswaram, Bangalore
<http://www.agnisoft.com>

Project Name: Fulcrum
Client: Fulcrum IT, USA
Designation: Developer
Roles: Implementation
Tools Used: Delphi 5, MIDAS
Database: Oracle 8i

Fulcrum is an insurance agency management software. A general agency and workflow management system, it is designed for industry-wide application to be used by wholesale agencies, excess and surplus brokers, and insurance companies. The software allows the management of policy file maintenance for the entire policy lifecycle.

Project Name: E-Forms
Client: iDOiNK Technologies, UK
Designation: Developer
Roles: Design, Documentation, Implementation, Testing
Tools Used: Delphi 5

E-Forms is a full-featured form-creation tool. It includes a form designer, extensible components, rich export formats and a Delphi-like interface with component palette, property editors and an object inspector.

Project Name: FaxServer
Client: iDOiNK Technologies, UK
Designation: Team Leader
Roles: Design, Documentation, Implementation, Testing, Delivery
Tools Used: Delphi 5, TurboPower Async Pro
Database: MS SQL Server 2000

FaxServer is a fax server software, used to centrally manage and maintain fax usage within an organization. It includes a Windows NT service to provide centralized handling, an administration tool and a set of Delphi components to create the client software.

Project Name: Gemini 3-Tier
Client: Centurion Solutions, USA
Designation: Developer
Roles: Implementation, Testing
Tools Used: Delphi 5, MIDAS
Database: InterBase 5.5

Gemini 3-Tier is a complete financial accounting and inventory management package used for county management. It is used to manage and maintain various department activities such as budgeting, expenses, payroll, project management and scheduling of activities.

May. 2000 – Nov. 2000
Software Engineer

Pragnaan Software Pvt. Ltd.
 RMV 2nd Stage, Bangalore
<http://www.pragnaan.com>

Project: MRP-II Solution
Client: Acumac Tools Pvt. Ltd., Peenya, Bangalore
Designation: Team Leader
Roles: Design, Documentation, Implementation, Testing, Delivery
Tools Used: Delphi 5
Database: MS SQL Server 7 / 2000

This project involved the automation of the entire factory workflow of the client, a machine tools manufacturer, including sales order processing, work/machine scheduling, tool design and project tracking.

EDUCATIONAL QUALIFICATIONS

Qualification	Institution	Date
Bachelor of Business Management (BBM)	Christ College, Bangalore <i>Finance Specialization</i>	1995 - 1998
Pre-University	Christ College, Bangalore <i>Commerce Stream</i>	1993 - 1995
Std. X	St. Germain's Boys' High School, Bangalore	1993

OPEN SOURCE PROJECTS

ID3.NET

<http://www.sourceforge.net/projects/id3dotnet>

ID3.NET is a .NET class library that implements the full ID3 v1.x/v2.x & Lyrics3 v2 specs for reading & writing from MP3 files. It also provides an extensible framework for retrieving lyrics, album art (cover art) & other ID3 information from online services such as Amazon.com.

ID3.NET is written in C# 2.0 and uses SOAP and REST -based web service technologies.

ConsoleFx

<http://www.sourceforge.net/projects/consolefx>

<http://www.codeplex.com/ConsoleFx>

ConsoleFx is an attribute-based .NET/Mono framework for easily developing command-line interface (CLI) applications. It automates most of the work involved in creating a command line application, like command line argument parsing, error handling and validations.

ConsoleFx is written in C# 2.0.

ContactSync

<http://www.sourceforge.net/projects/contactsync>

ContactSync is a set of .NET libraries, UI controls and applications for managing & synchronizing contact information. It includes managed wrappers for file formats like vCard, and classes to manage/sync contact information with popular applications (like Outlook and Thunderbird) & online services (like Gmail, Plaxo, Windows Live, etc).

ContactSync is written in C# 2.0 and 3.0.
